

Positive Impact at a Glance

October 2021 - September 2022

'Positive Impact' has been incorporated into our mission, vision, ambitions and strategy. In the years to come it will be an integral part of our daily activities: Positive Impact will drive our performance and set the scope for our growth, financial returns and the evolution of our portfolio. Our efforts and ambitions will be guided by **B Corp** and aligned with the **UN SDGs**. And we'll seek out and work with partners who share our Positive Impact ambitions. We've set out three domains in which we want to make this positive impact:

Purpose

Plant Based Positive Impact

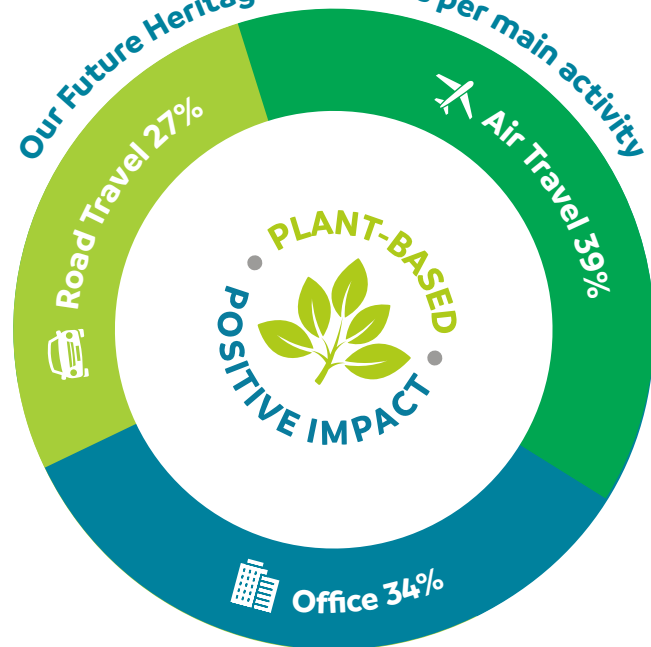

SDG 2
Green products

SDG 3
Our Future Heritage

SDG 13
Climate & shipping

Meelunie has reduced and compensated its Our Future Heritage emissions (336.2 mt CO₂e). This makes Meelunie a carbon neutral organization. Our emissions are shown per office on the map.

Check out our progress in our corporate social responsibility report:
